

Frankfort Heritage Christian School

Part of Living Word Fellowship Ministries

***Multi-purpose
structures are
quickly becoming
popular options for
many churches.***

Is your congregation one which seeks to get the most value by using a new building as a multi-purpose facility? If so, you are one of a number of growing churches which are following this popular trend. Congregations are open to the idea of a building which functions as worship, fellowship, and recreation facility.

In 1986, UCS built an 80' dome sanctuary for the Living Word Fellowship Ministries. We had the pleasure of returning to Frankfort, Indiana, in 1997, to assemble a 120' geodesic dome for the church's school gymnasium. Being in the middle of basketball country, the quality of the gym floor was very important. The school went to Cincinnati, Ohio, to get the finest wood floor they could find.

The principal informed us that visiting volleyball teams always comment on the height of the building and the fact that the balls do not hit the ceiling.

If you are interested in more information about how our structures can benefit your church or Christian school, please contact us at 1-800-854-0977.

Frankfort Heritage Christian Notes:

- Structure: 120' geodesic dome
- Builder: Daniel Howe Builders
- Assembled by UCS in August, 1997
